### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***DETAILED OFFICE ACTION***

***Election/Restrictions***

Claims 1- 32 are pending in this application.

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-22 drawn to a semiconductor device, classified in class 257, subclass 295.

Group II. Claims 23-32, drawn to process of making a semiconductor device, classified in class 438, and subclass 03.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of following can be shown: (1) that the process as claimed can be use to make other and materially different product or by hand, or (2) that process as claimed can be made by another and materially different process. (MPEP § 806.05(f)). In the instance case unpatentabilities of the group I invention would not necessarily imply unpatentability of the group II invention, since the device of the group I invention could be made by the processes materially different from those of the group II invention, for example, in the claim 23 a method for making the device of claim 1, wherein the step providing a nonmagnetic spacer region with a surface and an opposed surface; and positioning a free magnetic region, the free magnetic region being positioned on the surface of the nonmagnetic spacer region wherein the free magnetic region includes a plurality of magnetic layers and wherein a magnetic layer in the plurality of magnetic layers positioned adjacent to the nonmagnetic spacer region has a thickness substantially greater than a thickness the magnetic layers subsequently grown thereon to obtain a desired

**magnetic switching field variation can be implemented by making the free magnetic region first and position the spacer layer on the free layer second; this method is a materially different method from claim 23 and the same structure of claim 1 will resulted.**

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, the fields of search are not co-extensive. Therefore, separate examination would be required and restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).
